

WORLD TRADE ORGANIZATION

World Trade Statistical Review 2021

Merchandise trade volume

About the WTO

The World Trade Organization deals with the global rules of trade between nations. Its main function is to ensure that trade flows as smoothly, predictably and freely as possible.

About this publication

World Trade Statistical Review provides a detailed analysis of the latest developments in world trade. It is the WTO's flagship statistical publication and is produced on an annual basis.

For more information

All data used in this report, as well as additional charts and tables not included, can be downloaded from the WTO web site at www.wto.org/statistics

This publication has been prepared under the direction of Robert Koopman, Director of the Economic Research and Statistics Division, and the International Trade Statistics Section. The coordination of the report was undertaken by Christophe Degain and Florian Eberth. Statistical research, data compilation and the preparation of estimates were conducted by Barbara d'Andrea-Adrian, Shradha Bhatia, Lori Chang, Christophe Degain, Florian Eberth, Zineb Haj Nassar, Coleman Nee, Steen Wettstein, and Ying Yan.

Contributions to this publication were also provided by the WTO's Market Access Intelligence Section and Research Group of the Economic Research and Statistics Division.

The International Trade Statistics Section also wishes to thank colleagues from the Information and External Relations Division (IERD) and the Languages Documentation and Information Management Division (LDIMD) whose collaboration is vital in the production of this report. In particular, recognition is due to Anthony Martin, Serge Marin-Pache and Steve Cooper in IERD and to the French and Spanish translators in LDIMD.

Finally, we wish to thank the users of WTO statistics for their constructive suggestions on how to improve our statistical output. This regular feedback allows us to constantly refine the data we provide.

A message from Director-General Ngozi Okonjo-Iweala

The COVID-19 pandemic has had devastating consequences across the world. Millions of people have lost their lives, and large sections of the world's population, particularly in developing and least developed countries, remain unvaccinated. The worst economic downturn since the 1930s has disrupted livelihoods and businesses everywhere. Extreme poverty and hunger are on the rise, and employment is well below the pre-crisis trend.

This publication presents recent trends in world trade and seeks to provide statistical insights on the trade impact of COVID-19.

In 2020, the value of world merchandise exports declined by 8 per cent while services trade contracted by 21 per cent. The most severe impacts of the pandemic were felt in the second quarter of the year, when services trade dropped by a record 30 per cent as travel and transport were severely affected, while goods trade fell by 23 per cent, both in value terms.

Trade began to recover as of mid-2020, but the effects of COVID-19 have varied significantly across countries and regions. In volume terms, which strip out the effects of fluctuating prices, Asia's merchandise trade was down by only 0.5 per cent in 2020, compared to the global decline of 5.3 per cent. Asia's resilience was due to the relative success of many countries at containing the virus's spread in early 2020, together with the region's role as a leading global supplier of consumer goods and medical products. In the first quarter of 2021, merchandise export volumes were up in Asia and Europe. They were down slightly in South and Central America and North America, and more substantially in Africa and the Middle East. Across manufacturing sectors, the automotive sector suffered the most, with world exports dropping by 16 per cent in 2020. Meanwhile global exports of textiles grew by 16 per cent, driven by an increase in the production of personal protective equipment (PPE). Exports of medical products, including medicines, medical equipment and PPE, rose by more than 16 per cent, underscoring how trade has been a lifeline for access to critical goods through the pandemic, after the initial disruptions.

Global value chains were severely disrupted during the first half of 2020. World exports of intermediate goods decreased by 10 per cent year-on-year. Trade was more resilient in value chains for high-tech goods and pharmaceutical/medical products. Trade in intermediate goods across countries started to recover in the third quarter of 2020.

As of the first quarter of 2021, global trade in commercial services remained 9 per cent lower than in the same period in 2020. The travel sector was the most affected, as border closures, quarantine requirements, lockdowns, and other restrictions caused global travel exports to decline by 62 per

cent in 2020. In contrast, demand for computer services was buoyant, reflecting the shift to remote work and the growth in digital platforms.

Exports from least-developed countries (LDCs) were severely affected by the first wave of the pandemic in 2020. They suffered in particular from the drop in fuel prices (-60 per cent between January and April 2020) and the impact of restrictions on the travel industry. These two sectors represent the largest source of LDCs' export earnings. LDCs' fuel exports have started to slowly stabilize since early 2021 but services trade continues to be weighed down by persisting weakness in the travel and transport sectors.

Leading indicators confirm positive signs of recovery in goods trade during the second quarter of 2021, but purchasing managers' indices suggest weaker growth in services trade. As of May 2021, the number of international flights was just over half their pre-pandemic level. A full recovery for international travel, and for global trade in general, depends on rapid, equitable access to COVID-19 vaccines around the world. Indeed, with much of the world still unvaccinated, the emergence of new coronavirus variants is one of the leading threats to the economic and trade recovery.

The COVID-19 pandemic has accelerated digital transformation, including with regard to the international exchange of goods and services. This trend increases potential trading opportunities for micro, small and medium-sized enterprises (MSMEs) and women, provided they can overcome supply-side barriers. It also emphasizes the need to tackle the digital divide. From a statistical standpoint, there is a strong need to improve the measurement of digital trade.

Finally, I would like to thank the statistical team and the other divisions across the WTO who worked on this report. We hope it provides useful insights to assist trade analysts and policymakers.

Chapter II

Highlights of world trade in 2020 and the impact of COVID-19

World trade overview	10
Merchandise trade	12
Commercial services	15
Leading traders	18
Least-developed countries (LDCs)	19

World trade overview

Trade in goods and services experienced a deep slump in 2020 due to the COVID-19 pandemic

Chart 2.1

World trade in goods and commercial services, 2010-2020, quarterly

(Year-on-year percentage change)

Source: WTO-UNCTAD-ITC.

Note: Trade as average of exports and imports.

- The COVID-19 pandemic led to merchandise trade declining by **8 per cent** and trade in commercial services contracting by **21 per cent** year-on-year in 2020.
- The effect of COVID-19 on goods and services differed, with services more severely affected. Services declined by **30 per cent** in the second quarter of 2020 compared with a fall of **23 per cent** for goods in the same period. While lockdowns led to the cancellation of flights, holidays abroad, restaurant meals, and cultural/recreational activities, the

demand for essential goods held up in all major economies. Unlike goods, services cannot be stockpiled, which means that most of the revenue losses are likely to be permanent.

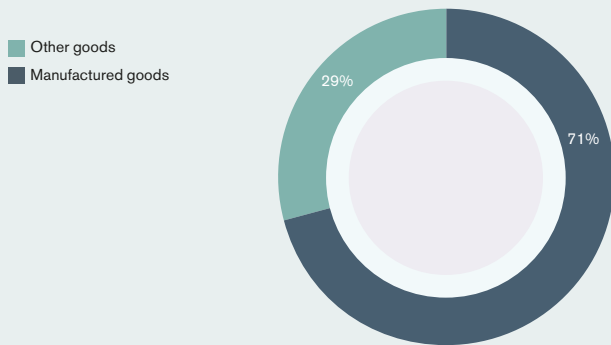

- As businesses adjusted to new working conditions and vaccines began to be rolled out in the last quarter of 2020, trade in goods saw a recovery of **1 per cent** compared with its pre-pandemic level in Q4 of 2019.

Source: WTO-UNCTAD in cooperation with ITC and UNSD.
Note: Average of exports and imports.

Source: WTO estimates.

Trade in goods and services

World trade in goods and services amounted to **US\$ 22 trillion** in 2020, a 12 per cent decline compared with 2019.

China

China, the top exporter of merchandise trade in 2020, accounted for 13 per cent of the world's total (up from 12 per cent in 2019), totalling **US\$ 2,323 billion**.

Manufactured goods

Trade in manufactured goods represented **71 per cent** of world merchandise exports in 2020, with a value of **US\$ 12.1 trillion**.

Travel

Travel - including tourism and related services - plunged in 2020 as travel restrictions were imposed due to the pandemic. World travel exports dropped to **US\$ 549 billion** compared with **US\$ 1,468 billion** in 2019.

Medical goods

The share of medical goods in world merchandise trade grew from 5.3 per cent in 2019 to **6.6 per cent** in 2020.

Merchandise trade

World merchandise trade

All regions recorded declines in merchandise trade in 2020. Trade in nominal US dollar terms fell more sharply than trade in volume terms. The impact of the pandemic on merchandise trade differed across regions.

Chart 2.2
World merchandise trade by region, 2020
(Annual percentage change)

-0.5%

A decline of only 0.5 per cent in Asia in 2020 was due to COVID-19 having an earlier impact than in other regions, Asia's rigorous management of the crisis and its role as a global supplier of consumer goods and medical products.

Merchandise exports

World exports of manufactured goods decreased by 5.2 per cent in 2020 while total merchandise exports declined by 7.7 per cent overall.

Chart 2.3
Merchandise exports by major product group, 2010-2020
(US\$ billion, annual percentage change)

-23.9%

Fuels and mining products declined by 23.9 per cent in 2020, due to a big drop in energy prices and a fall in demand.

+0.9%

Exports of agricultural products increased by 0.9 per cent in 2020 as many countries depended on food exports during the COVID-19 crisis.

* Estimate of product break-down.

Source: WTO estimates.

Note: Data including intra-trade of the European Union, excluding re-exports of Hong Kong, China

World exports of manufactured goods

World exports of automotive products were the most affected, among manufactured goods, by the pandemic while textiles saw a strong increase.

Chart 2.4

World merchandise exports of manufactured goods, 2020
(Annual percentage change)

Source: WTO estimates.

Note: Data including intra-trade of the European Union, excluding re-exports of Hong Kong, China.

+16.0%

Due to demand for protective personal equipment, world exports of textiles increased the most among manufactured goods in 2020, growing by 16.0 per cent.

-16.4%

Exports of automotive products suffered from disruptions to production lines and weak demand in 2020, declining by 16.4 per cent.

Trade in medical goods

Trade in medical goods registered growth of 16.3 per cent in 2020 - compared with 4.7 per cent growth in 2019 when the pandemic was just starting.

Chart 2.5

World merchandise trade in medical goods, by product group, 2019 and 2020
(Annual percentage change)

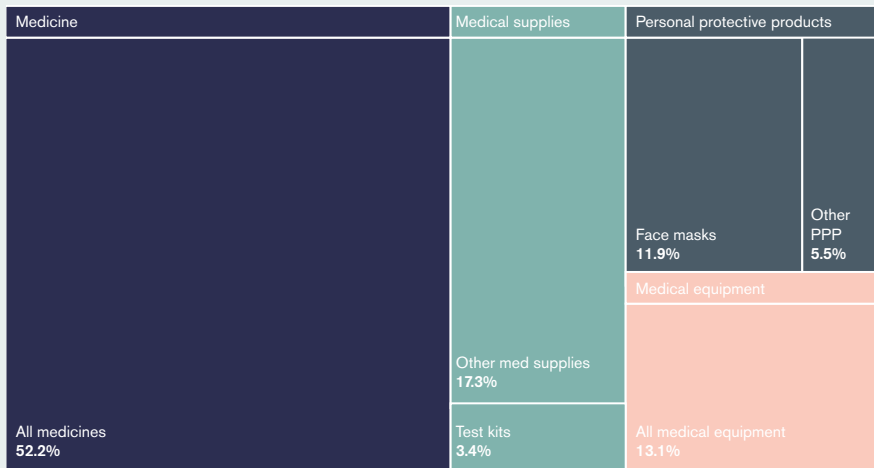

Source: WTO estimates.

+47.2%

Trade in medical goods increased significantly in 2020, with trade in personal protective products growing the most (+47.2 per cent).

Chart 2.6
World merchandise trade in medical goods, by product group, 2020
 (Percentage share)

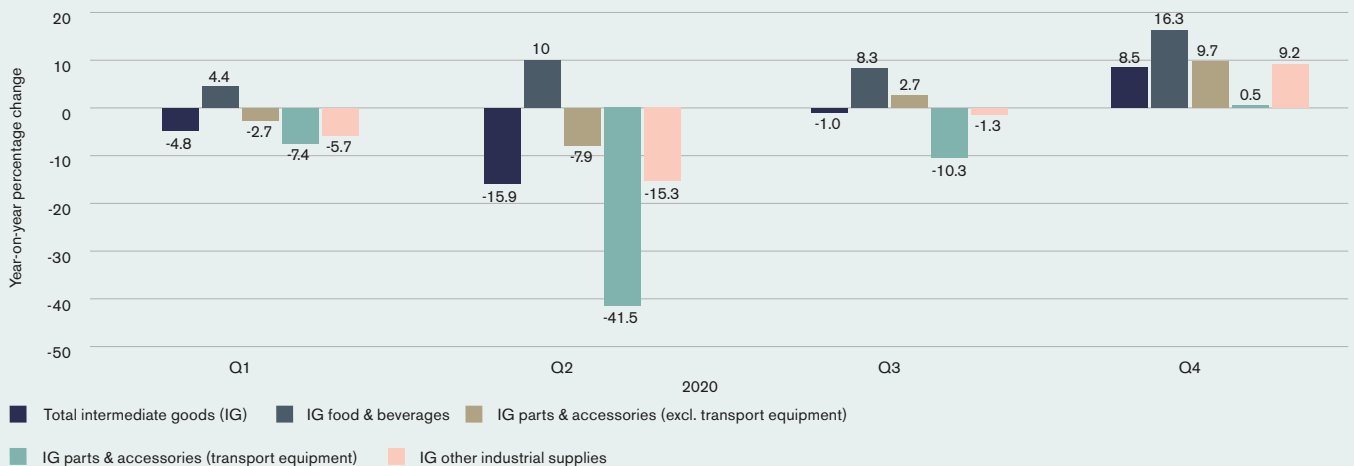

52%
 Medicine represented 52 per cent of world trade in medical goods in 2020.

Source: WTO estimates.

World exports of intermediate goods

After three successive negative quarters, world exports of intermediate goods rose by 8.5 per cent year-on-year in Q4 of 2020, a sign of strong recovery in supply chains.

Chart 2.7
World exports of intermediate goods, total and by main category
 (Year-on-year percentage change)

Source: WTO estimates.

+16.3%
 Exports of food and beverage intermediate goods increased by 16.3 per cent in Q4 of 2020 as food supply chains remained resilient and continued to meet demand.

+0.5%
 Exports of transport equipment saw a slight recovery in Q4 of 2020, increasing by 0.5 per cent year-on-year. The automotive sector was severely affected by COVID-19, with a decline in sales and supply chain disruption.

Commercial services

Trade in commercial services by sector

Travel and transport were the hardest hit by COVID-19 and associated travel restrictions.

Chart 2.8
World trade in commercial services by sector quarterly, 2008-2020
(Year-on-year percentage change)

Source: WTO-UNCTAD-ITC.
Note: Trade as average of exports and imports.

-81%

International travellers' expenditure was down by 81 per cent and transport by 29 per cent in Q2 of 2020. The decline in transport was similar to the drop in the financial crisis of 2009. However, unlike in 2009, the decrease in transport services trade was driven predominantly by restrictions to passenger transport and a fall in demand for international travel rather than by sharp declines in freight shipping.

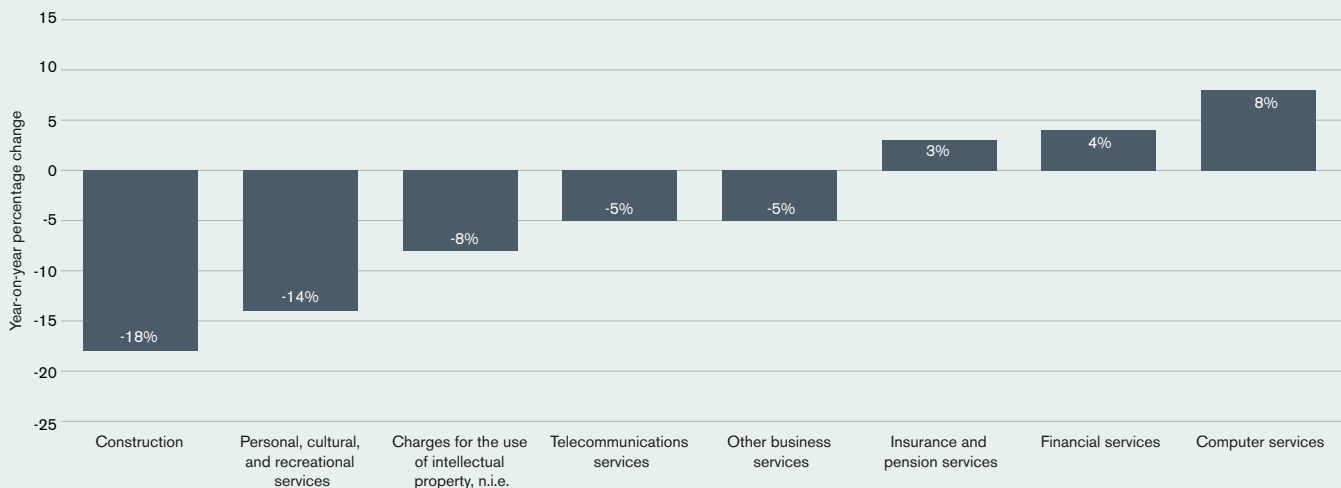

Other commercial services

Other commercial services were affected unevenly by the pandemic. Sectors requiring physical proximity, such as construction, and personal, cultural and recreational services, fell steeply. Financial services, in contrast, continued to grow.

Chart 2.9

Other commercial services by subsector, 2020

(Year-on-year percentage change)

Source: WTO-UNCTAD estimates.

8%

Computer services, the fastest growing services sector over the past 10 years, grew by 8 per cent in 2020, boosted by a shift towards remote working and increased digitalization.

-18%

With building projects delayed or postponed in many countries due to the pandemic, global construction exports were down 18% in 2020.

Composition of commercial services

Chart 2.10

Change in composition of commercial services between 2019-2020

(Percentage share)

- The share of transport and travel in total services trade declined from 43 per cent to 31 per cent in 2020.
- Other commercial services - including financial services, legal services, computer services and professional services - increased their share from 54 per cent to 66 per cent.

Source: WTO-UNCTAD estimates.

Note: Trade as average of exports and imports

Exports of computer services

Exports of computer services saw double-digit growth in many economies across various regions in 2020. Rapid growth was recorded in most economies, in marked contrast with declines in other services sectors.

Chart 2.11

Exports of computer services, selected economies, 2020
(Year-on-year percentage change)

13%

US exports of computer software increased by 13 per cent in 2020, mostly destined for the EU (22 per cent), Canada (12.6 per cent), Japan (10.9 per cent), the UK (9.1 per cent) and Switzerland (6 per cent).

25%

US exports of cloud computing and data storage services rose by 25 per cent in 2020, accounting for 16.8 per cent of US computer services exports, up from 7.8 per cent in 2015.

Leading traders

Among the world's top 100 traders, Slovenia and Cambodia rose many places in the world rankings for merchandise trade in 2020, mostly due to their manufacturing sectors, which are well integrated into regional supply chains.

Economies where commercial services trade mostly consists of tourism and travel services witnessed a big decline in their ranking in 2020. Examples include Macao, China and the Lebanese Republic.

Chart 2.12
Merchandise traders changing their rankings among the world's top 100, 2019-2020
 (Rank)

Source: WTO-UNCTAD.

Chart 2.13
Commercial services traders improving their rankings among the world's top 10, 2019-2020
 (Rank)

Source: WTO-UNCTAD estimates.

50

Slovenia recorded one of the largest increases in world ranking for merchandise trade, improving from 58th place in 2019 to 50th in 2020.

64

Macao, China experienced the sharpest fall in the ranking for services trade, dropping from 44th position in 2019 to 64th in 2020.

Least-developed countries (LDCs)

LDCs' exports of goods amounted to US\$ 173 billion in 2020, a 12 per cent decrease from 2019, while LDC commercial services exports totalled US\$ 28 billion, collapsing by 35 per cent. Goods exports suffered particularly from a 30 per cent drop in fuel prices, with fuels and mining products

representing around half of LDCs' merchandise exports. In services, LDCs were hit by travel restrictions, with travel receipts representing the largest source of services export earnings for LDCs.

Chart 2.14
Exports of Least Developed Countries, 2016-2020
(US\$ billion)

Source: WTO-UNCTAD estimates.

-12%
LDCs' goods exports declined by 12 per cent in 2020, compared with 9 per cent for the rest of the world.

-35%
The value of LDCs' commercial services exports declined by 35 per cent in 2020, a sharper decline than in the rest of the world (-20 per cent).

World trade and economic growth, 2020-21

Trade and GDP in 2020 and early 2021	22
Merchandise trade volume	23
Commodity prices	26
Exchange rates	27
Merchandise and services trade values	28
Leading indicators of trade	31
Economic recovery from COVID-19	34

World merchandise trade volume and real GDP fell sharply in the first half of 2020 as a result of the COVID-19 pandemic before rebounding in the second half. Consequently, trade and output declined less than initially expected for the year. The volume of merchandise trade dropped by 5.3 per cent in 2020 while real GDP at market exchange rates declined by 3.6 per cent.

Merchandise trade and commercial services trade in current US dollar terms plunged in the early stages of the pandemic. Merchandise trade rebounded strongly in the second half of 2020 but services continued to be weighed down by travel restrictions. The value of merchandise exports fell by 8 per cent in 2020 to US\$ 17.58 trillion while commercial services exports dropped by 20 per cent to US\$ 4.91 trillion.

The decline in merchandise trade in 2020 was less severe than forecasters predicted for a number of reasons. These included proactive fiscal and monetary policies that boosted incomes and consumption, an increase in demand for technological innovation to facilitate remote work, and trade policy restraint that kept supply chains functioning.

The post-pandemic trade recovery is already showing signs of divergence across countries and regions. Merchandise export and import volumes in the first quarter of 2021 rose to new heights in Asia and reverted to pre-pandemic levels in Europe and North America but lagged behind in poorer, less industrialized regions, such as Africa and the Middle East.

Trade and GDP in 2020 and early 2021

The volume of world merchandise trade declined significantly in 2020, with only the financial crisis of 2008-09 having seen a steeper decline. However, it could have been even greater in view of the contraction in GDP.

Chart 3.1

World merchandise trade volume and real GDP growth, 2014-20

(Annual percentage change)

Sources: WTO Secretariat for trade, consensus estimates for GDP.

Note: GDP growth is calculated with market exchange rate weights.

- The volume of world merchandise trade declined by 5.3 per cent in 2020 as the COVID-19 pandemic severely jolted the global economy. This followed a sharp decline in trade the previous year, with volume growth of just 0.2 per cent as trade tensions between leading nations remained high.
- The decline in merchandise trade in 2020 was even larger when measured in nominal US dollar terms, with the value of exports falling by nearly 8 per cent to US\$ 17.58 trillion. The dollar value of commercial services exports declined even more, dropping by 20 per cent to US\$ 4.91 trillion.
- The large decline in services trade is mostly due to travel restrictions and lockdowns, which prevented the delivery of services requiring physical proximity. Some income not spent on services may have been diverted to goods, supporting merchandise imports.
- The 5.3 per cent decline in merchandise trade volume in 2020 was accompanied by a 3.6 per cent contraction in world real GDP at market exchange rates. The trade decline was therefore 1.5 times larger than the decline in output. This is smaller than in 2009 following the global financial crisis, when trade volumes fell 12.6 per cent, six times more than the 2.0 per cent slump in GDP.

Merchandise trade volume

The 2020 contraction in the volume of merchandise trade started in the first quarter and accelerated in the second. The subsequent rebound in the third and fourth quarters was strong enough to return merchandise trade to its pre-pandemic level by the end of the year.

Chart 3.2

World merchandise trade volume, 2015Q1-2021Q1

(Volume index 2015=100 and year-on-year percentage change)

Sources: WTO Secretariat and UNCTAD.

- World merchandise trade volume fell by 2.0 per cent in the first quarter of 2020 compared with the previous quarter and a further 12.5 per cent in the second quarter. By the end of the second quarter, merchandise trade was down 15.5 per cent compared to the same period in 2019.
- Merchandise trade jumped 11.4 per cent in the third quarter of 2020 compared with the previous quarter and another 4.4 per cent in the final quarter, bringing the volume of trade back to its level in the fourth quarter of 2019. By comparison, merchandise trade took more than two years to recover to its pre-crisis level after the financial crisis.
- Trade growth slowed to 2.1 per cent in the first quarter of 2021 compared with the previous quarter while year-on-year growth picked up to 4.3 per cent. Year-on-year growth is expected to be very strong in the second quarter of 2021, mostly due to the downturn in the second quarter of 2020.

The recovery of merchandise trade since the third quarter of 2020 has been strong but uneven, with exports and imports growing faster in some regions than in others.

Chart 3.3

Merchandise exports by region, 2015Q1-2021Q1

(Volume indices 2015Q1=100)

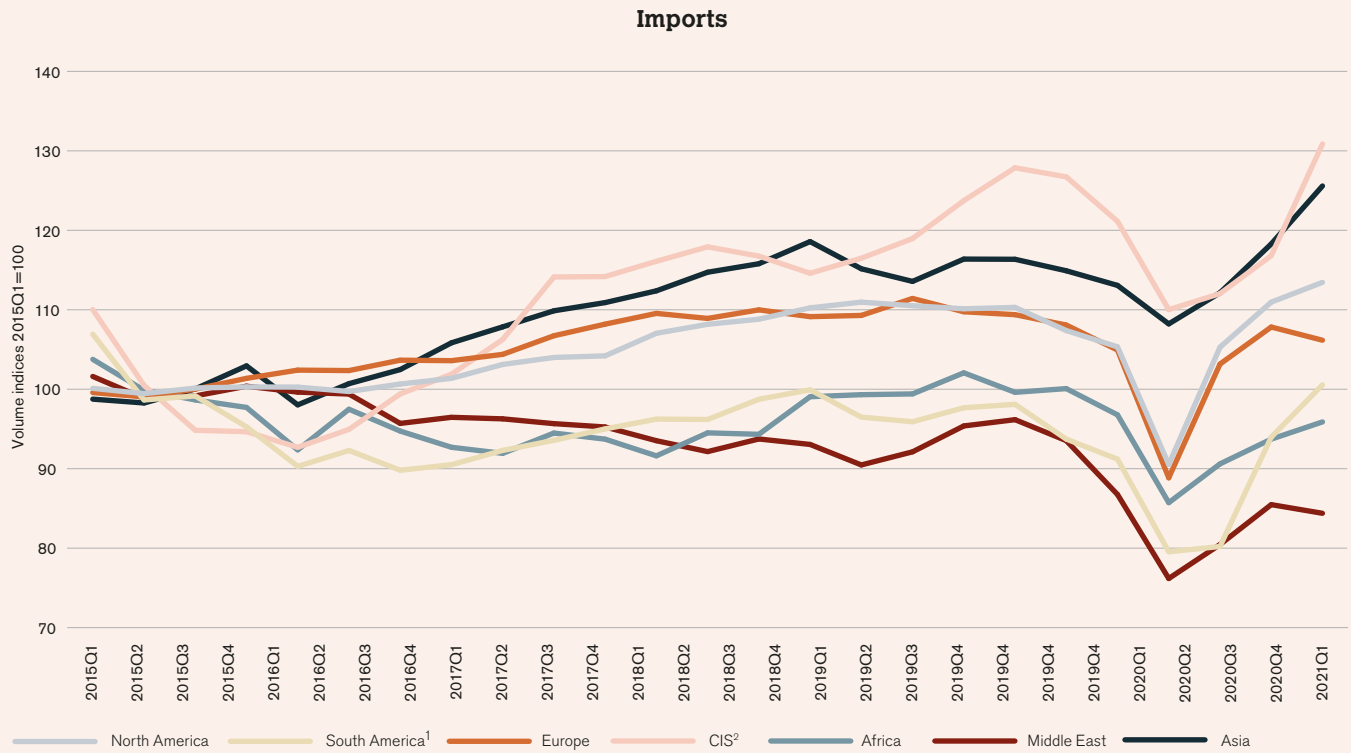

¹ Refers to South and Central America and the Caribbean.

² Refers to Commonwealth of Independent States, including certain associate and former member States.

Sources: WTO and UNCTAD.

- All regions recorded year-on-year declines in merchandise trade volumes in the second quarter of 2020 except the Commonwealth of Independent States (including certain former and associate members), which saw a 2.8 per cent rise in its exports. North American exports declined the most (-25.5 per cent), followed by Africa (-21.7 per cent), Europe (-20.4 per cent) and the Middle East (-19.7 per cent). Smaller declines were seen in South and Central America (-9.0 per cent) and Asia (-7.1 per cent).
- All regions have seen merchandise exports and imports recover to varying degrees since trade bottomed out in the second quarter of 2020. In the first quarter of 2021, merchandise export volumes were up in Asia (21.0 per cent year-on-year) and Europe (1.9 per cent). They were down slightly in South and Central America (-0.1 per cent) and North America (-2.2 per cent). They were also down more substantially in Africa (-4.6 per cent), the Middle East (-8.4 per cent) and the Commonwealth of Independent States (-13.9 per cent).

Chart 3.4
Merchandise imports by region, 2015Q1-2021Q1
 (Volume indices 2015Q1=100)

¹ Refers to South and Central America and the Caribbean.
² Refers to Commonwealth of Independent States, including certain associate and former member States.
 Sources: WTO and UNCTAD.

- All regions had large year-on-year import contractions for merchandise trade volumes in the second quarter of 2020, including the Middle East (-20.1 per cent), Europe (-19.0 per cent), South and Central America (-18.6 per cent), North America (-17.8 per cent), Africa (-16.0 per cent), the Commonwealth of Independent States (-11.1 per cent), and Asia (-7.0 per cent).
- Merchandise import volumes were up year-on-year in all regions in the second quarter of 2020 except in Africa (-0.9 per cent) and the Middle East (-2.7 per cent). Overall, it appears that the trade recovery has been strongest in Asia and weakest in regions that rely on exports of natural resources.

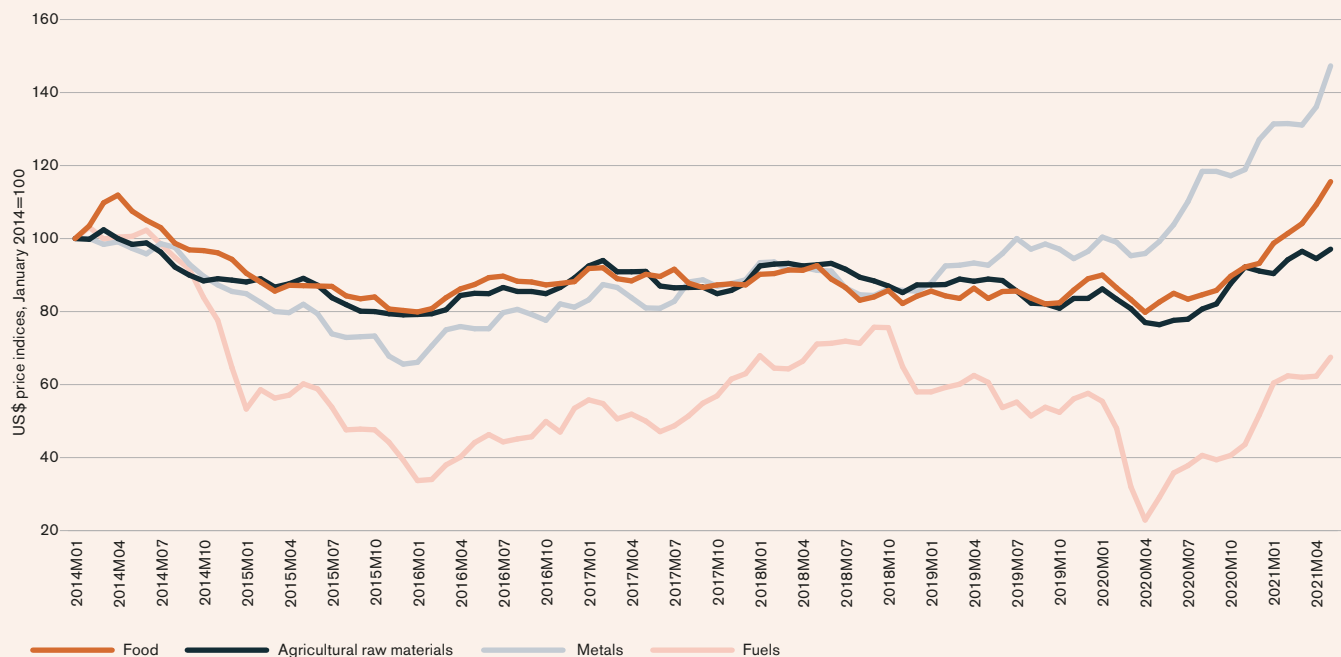

Commodity prices

Prices of energy commodities fell sharply during the first wave of the pandemic but have risen steadily since then.

Chart 3.5

Prices of primary commodities, January 2014 - May 2021

(US\$ price indices, January 2014=100)

Source: IMF primary commodity prices.

- Fuel prices fell by 60.1 per cent between January and April 2020 as the pandemic resulted in a decline in domestic and international travel. Smaller declines over the same period were recorded for other commodities, such as food (-10 per cent), agricultural raw materials (-8 per cent) and metals (1 per cent).
- Fuel prices rose steadily after April 2020 as economic growth picked up and travel restrictions were eased in

the summer. Successive waves of COVID-19 do not appear to have had as strong an impact on fuel prices. Other commodity prices have also risen since April 2020, raising concerns about a build-up in inflationary pressures.

- In May 2021, fuel prices were up 194 per cent year-on-year. Prices were also up 54 per cent for metals, 45 per cent for food and 26 per cent for agricultural raw materials.

Exchange rates

The US dollar appreciated sharply early in the pandemic but has fallen in value against other currencies since its peak in April 2020.

Chart 3.6
Exchange rate indices for selected economies, January 2014 – May 2021 ^a
(Index, January 2014=100)

^a Nominal effective exchange rate indices against a broad basket of currencies.
Source: Bank for International Settlements (BIS).

- The US dollar appreciated 7 per cent on average against currencies of trading partners between January and April 2020, reflecting the traditional safe-haven status of the currency.
- The appreciation of the dollar probably contributed to the fall in fuel prices denominated in dollars over the same period since these variables tend to move in opposite directions. However, the appreciation would only account for a small fraction of the 60 per cent drop in fuel prices over the same period.
- The dollar fell in value by 9 per cent between April and December 2020 as global economic growth picked up and expansionary monetary and fiscal policy put downward pressure on the currency. The nominal effective exchange rate of the US dollar was relatively stable between January and May 2021.
- Exchange rates of other major currencies fluctuated less than the dollar exchange rate during the pandemic.

Merchandise and services trade values

The sharp decline and subsequent recovery of merchandise trade in 2020 was mostly due to trade in manufactured goods.

Chart 3.7

Growth in world merchandise trade by sector, 2020Q1-2021Q1

(Year-on-year percentage change in US\$ values)

Sources: WTO estimates and UNCTAD.

- The US dollar value of world trade in manufactured goods was down 18 per cent year-on-year in the second quarter of 2020 but by the first quarter of 2021 trade had risen by 16 per cent above its level from the same period the previous year.
- The growth rates are similar to those for total merchandise trade since manufactured goods account for the vast majority of this trade (73 per cent in 2020).
- Trade in agricultural products declined less than trade in manufactured goods during the second quarter of 2020 (-5 per cent) and by the first quarter of 2021 it was up substantially (+11 per cent). The lower decline for agricultural products trade in the second quarter is mostly due to the ongoing need for vital food supplies.
- The sharp 43 per cent decline in fuels and mining products trade in the second quarter of 2020 and the partial recovery since then reflect both falling prices and the availability of reduced quantities.
- Most types of manufactured goods saw significant gains in the second half of 2020, notably textiles, pharmaceuticals, computers and telecommunications equipment.

Export revenues fell most in oil-exporting regions during the pandemic but by the start of 2021 all regions were recording year-on-year growth.

Chart 3.8

Growth of merchandise trade by region, 2020Q1 - 2021Q1

(Year-on-year percentage change in US\$ values)

¹ Refers to South and Central America and the Caribbean.

² "Other regions" comprise Africa, Middle East and the Commonwealth of Independent States, including certain associate and former member states.

Sources: WTO and UNCTAD.

- Merchandise exports of Asia in current US dollar terms declined by 10 per cent year-on-year in the second quarter of 2020 but by the first quarter of 2021 they were up 28 per cent. In contrast, Europe recorded a larger decline in the second quarter of 2020 (23 per cent) and a smaller increase in the first quarter of 2021 (13 per cent).
- North America's merchandise exports were down heavily in the second quarter of 2020 (32 per cent) and were only up slightly (+4 per cent) in the first quarter of 2021. In South and Central America, exports were down 19 per cent in the second quarter of 2020 but up strongly (+13 per cent) in the first quarter of 2021.
- Merchandise exports of other regions, including Africa, the Middle East and the Commonwealth of Independent States, were collectively down 39 per cent in the second quarter of 2020, reflecting a persistent reduction in fuel consumption and a fall in prices during the pandemic but by the first quarter of 2021 exports were up 8 per cent.

Services trade recovered only partially in the second half of 2020, weighed down by COVID-19-related travel restrictions.

Chart 3.9

Growth in the value of world commercial services trade by category, 2020Q1-2021Q1

(Year-on-year percentage change)

Sources: WTO-UNCTAD-ITC estimates.

Note: Trade as average of exports and imports

- Services trade remained depressed in the first quarter of 2021 although the category of “other commercial services” - including financial services, business services and charges for the use of intellectual property - increased by 6 per cent.
- The biggest source of the decline was travel, which fell by 81 per cent in the second quarter. It was still down 62 per cent in Q1 2021, weighed down by pandemic related restrictions for cross-border movement of people.
- Transport also experienced a severe decline (-29 per cent in Q2 2020) due mostly to the reduction in international passenger flights, which were curtailed early in the pandemic. However, maritime transport held up relatively well, with a year-on-year decline in container throughput of around 7 per cent in Q2 of 2020. The sector recovered its year-on-year level in Q1 2021.
- Other commercial services, which includes financial and other business services, avoided large declines during the pandemic (down just 6 per cent in Q2 of 2020) due to the widespread adoption of technologies allowing remote work. These services sectors were the only ones having year-on-year positive growth since Q4 2020.

Leading indicators of trade

Leading indicators of trade provide clues about the strength of the global economy in the aftermath of the COVID-19 pandemic. These data continue to point to a strong but uneven recovery.

Chart 3.10
Global PMI new export orders indices, January 2010 - May 2021
(Index, base=50)

Source: IHS Markit.

Note: Values greater than 50 indicate expansion while values less than 50 denote contraction. No available data for services before September 2014.

- Purchasing managers' indices (PMIs) showed new export orders of manufacturers and services providers falling sharply early in the pandemic but rebounding strongly afterwards.
- New export orders of services fell to 21.8 in April 2020 while new export orders of manufacturing bottomed out at 27.1.
- Services export orders surpassed the baseline value of 50 for the index in April 2021 compared with September 2020 for manufacturing export orders, reflecting the weaker state of global services trade.
- As of May 2021, the manufacturing index continued to indicate a strong recovery in goods trade, with a value of 54.9. The services index suggested weaker growth in services trade, with a value of 51.0.

Container shipping fell in 2020 as the pandemic disrupted the global economy but throughput quickly returned to and surpassed pre-pandemic levels.

Chart 3.11
Global container throughput, January 2007 - April 2021
 (seasonally-adjusted index, 2015=100)

Source: Institute for Shipping Economics and Logistics.

- Container throughput of major ports dropped by 7 per cent between January and May 2020 as the pandemic hit international trade flows, according to the Institute for Shipping Economics and Logistics. However, by July the index had already risen above its level at the start of the year.
- For the whole of 2020, throughput was only down 1.3 per cent, reflecting the relative strength of goods trade and continued shipments of goods from Asia to the rest of the world.
- Throughput continued to increase in the first months of 2021. Average monthly growth between January and April was 0.7 per cent, which is equivalent to an annualized rate of 8.8 per cent.

International commercial flights slumped in 2020 as travel restrictions were imposed to slow the spread of COVID-19. In August 2020 the number of flights returned to just over half their level before the pandemic, but more widespread vaccination is required to increase passenger numbers and to achieve full recovery.

Chart 3.12
International commercial flights per day, 1 January 2020 - 30 May 2021
(Number of flights)

Source: Martin Strohmeier, et.al, "Crowdsourced air traffic data from the OpenSky Network 2019–2020", Earth System Science Data 13(2), 2021.

- International commercial flights per day fell to less than 10,000 in mid-April 2020, a decline of around 80 per cent from the start of the year. Many flights were devoted to cargo only as passenger flights were suspended.
- From mid-April 2020 until the end of the year, flights per day averaged 27,000, around 55 per cent of the level in January 2020.
- As of 30 May 2021, the number of daily flights remained below 30,000. Increased international travel will depend to a large extent on the success of vaccination programmes.

Economic recovery from COVID-19

Since the second half of 2020, WTO economists have predicted a strong rebound in world trade, with outcomes heavily dependent on GDP growth and the evolution of the pandemic. Growth in 2021 could exceed expectations if universal access to vaccines is achieved or fall short if vaccination efforts falter.

Chart 3.13

Real GDP growth of selected economies, 2020Q1 – 2021Q1

(Quarter-on-quarter percentage change)

Source: OECD National Accounts.

- GDP growth slowed in major economies in the first quarter of 2021 and is likely to remain slow in the second and third quarters as new waves of infection prompted new lockdowns and travel restrictions.
- GDP growth in the United States rose to 1.6 per cent in the first quarter of 2021 compared with the previous quarter. This is equivalent to around 6.5 per cent on an annualized basis. Meanwhile, EU GDP contracted by 0.1 per cent in the first quarter as the virus resurged in the region.
- China's economy grew by 0.6 per cent in the first quarter of 2021. This is equivalent to 2.4 per cent on an annualized basis. Excluding the sharp contraction in the first quarter of 2020 that coincided with the emergence of COVID-19, this is the weakest quarterly result for China since the country started reporting quarter-on-quarter GDP growth in 2011.

Despite the strong recovery in merchandise trade in value terms in the first quarter of 2021, exports of many economies remained below their pre-pandemic peaks.

Chart 3.14

Cumulative merchandise exports of selected economies, January-April 2021

(Percentage change compared to January-April 2019)

Sources: WTO and UNCTAD.

Note: Colombia, Egypt, Tunisia and Ukraine refer to January - March 2021

- Merchandise exports of the United States increased by only 1 per cent between January and April 2021 compared with the same period in 2019 while those of the European Union rose by 10 per cent.
- Russia's merchandise exports remained below their level of two years ago (-8 per cent) while those of China were up sharply (+31 per cent).
- Some African countries, such as Zambia (+38 per cent), benefitted from improved terms of trade in January-April 2021 as metals prices rose nearly 50 per cent whereas others, such as Namibia (-17 per cent), did not.

Regional growth in merchandise trade volume has varied much more than it did before the pandemic, with Asia exceeding growth in other regions for both exports and imports.

Chart 3.15
Change in merchandise trade volume by region, 2021Q1
 (Percentage change compared to 2019Q1)

Exports

Imports

¹ Refers to South and Central America and the Caribbean.
² Refers to the Commonwealth of Independent States, including certain former and associate member states.
 Source: WTO.

- Asian merchandise export volumes were up 15 per cent in the first quarter of 2021 compared to the same period in 2019 while exports of all other regions were down compared to two years ago.
- Merchandise exports of oil-producing regions were down the most in 2021 due to reduced demand for fuels as a result of COVID-19-related travel restrictions.
- Asia also led other regions in merchandise imports, which were up 10 per cent for the year-to-date in 2021 compared to 2019.
- The weakness of Europe's year-on-year growth in merchandise imports was partly due to the resurgence of COVID-19 in the first quarter of 2021.

Regional disparities in nominal dollar-denominated merchandise growth in 2021 were similar to those in volume terms.

Chart 3.16

Change in merchandise trade values by region, 2021Q1
(Percentage change in US dollar values compared to 2019Q1)

Exports

Imports

¹ Refers to South and Central America and the Caribbean.

² Refers to Commonwealth of Independent States, including certain former and associate member States.

Sources: WTO-UNCTAD.

- The US dollar value of world merchandise trade was up 9 per cent for exports and 8 per cent for imports in the first quarter of 2021 compared to the first quarter of 2019.
- Asia's merchandise export and import values grew more than for all other regions over the last two years.
- Africa's merchandise export growth in value terms was stronger than in volume terms because of improved terms of trade. Metals prices were up nearly 50 per cent in the first quarter of 2021 compared to the first quarter of 2019.

Services exports remained depressed in many economies in the first four months of 2021. China was the major exception, with exports up strongly compared to the previous year.

Chart 3.17

Cumulative commercial services exports of selected economies, January-April 2021

(Percentage change compared to January-April 2019)

Source: WTO estimates.

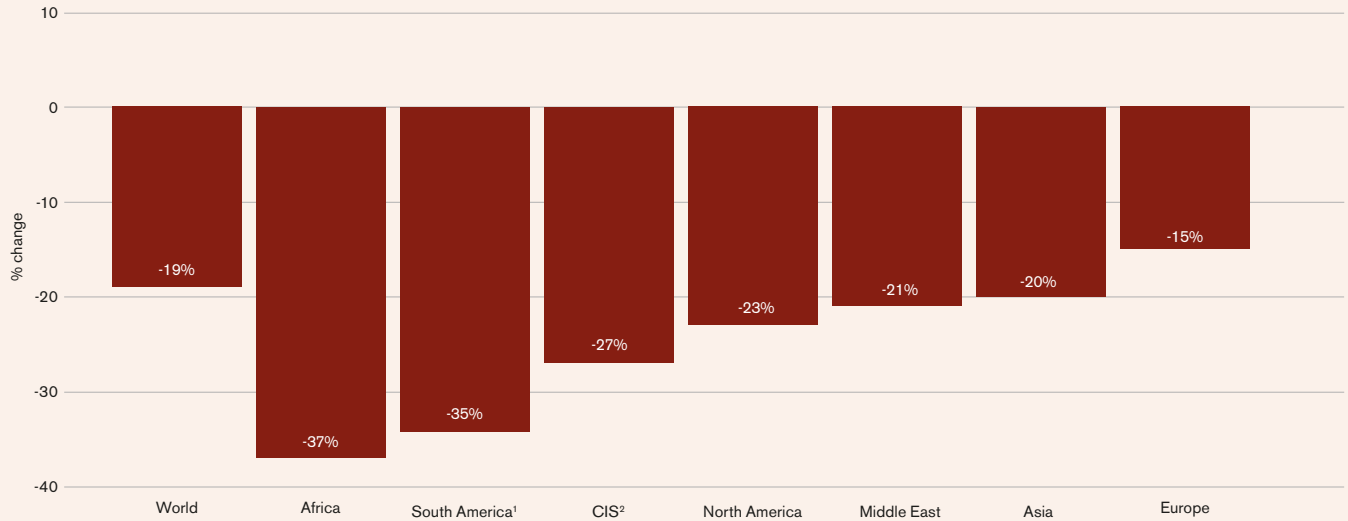

Note: Mongolia, Philippines, Portugal and Tanzania refer to January-March.

- China's cumulative exports of commercial services between January and April 2021 were up 25 per cent compared with the same period in 2019, more than any other major economy.
- India's exports were also up 3 per cent over the same period, while those of Germany, France and the United Kingdom were down 5 per cent, 7 per cent, and 9 per cent, respectively.
- Other major economies suffered double-digit declines, including the United States (-19 per cent), Italy (-25 per cent) and Australia (-36 per cent).

Europe’s exports and imports of commercial services were down less than other regions in the first quarter of 2021 but growth for all regions remained deeply depressed compared to the pre-pandemic period.

Chart 3.18

 (Percentage change in US dollar values compared to 2019Q1)

Exports

Imports

¹ Refers to South and Central America and the Caribbean.

² Refers to Commonwealth of Independent States, including certain former and associate member States.

Sources: WTO-UNCTAD-ITC estimates.

- World commercial services trade was down 19 per cent for exports and 18 per cent for imports in the first quarter of 2021 compared to the same period in 2019.
- Europe’s exports and imports of commercial services were down less than the world average in the first quarter of 2021, 15 per cent and 13 per cent respectively, while all other regions were down by more than the world average.
- Africa and South America and Central America, including the Caribbean, recorded the biggest declines in exports of commercial services due to continuing COVID-19 restrictions hampering travel exports.

Composition of geographical and economic groupings

Refer to the WTO Data Portal's Technical Notes for country group definitions (at data.wto.org).

Definitions and methodology

Merchandise trade

Exports and imports

Two systems of recording merchandise exports and imports are in common use. They are referred to as general trade and special trade and differ mainly in the way warehoused and re-exported goods are treated. General trade figures are larger than the corresponding special trade figures because the latter exclude certain trade flows, such as goods shipped through bonded warehouses.

To the extent possible, total merchandise trade is defined in this report according to the general trade definition. It covers all types of inward and outward movement of goods through a country or territory including movements through customs warehouses and free zones. Goods include all merchandise

that either add to or subtract from the stock of material resources of a country or territory by entering (imports) or leaving (exports) the country's economic territory. For further explanations, see United Nations International Trade Statistics, Concepts and Definitions, Series M, N° 52, Revision 3.

Unless otherwise indicated, exports are valued at transaction value, including the cost of transportation and insurance to bring the merchandise to the frontier of the exporting country or territory ("free on board" valuation). Imports are valued at transaction value plus the cost of transportation and insurance to the frontier of the importing country or territory ("cost, insurance and freight" valuation).

Products

All product groups are defined according to Revision 3 of the Standard International Trade Classification (SITC) and to Revision 4 of the Classification by Broad Economic Categories (BEC).

Throughout this report, other food products and live animals; beverages and tobacco; animal and vegetable oils, fats and waxes; oilseeds and oleaginous fruit are referred to as other food products; electronic data processing and office equipment is referred to as EDP and office equipment; and integrated circuits and electronic components is referred to as integrated circuits.

Agricultural products according to the AoA (WTO Agreement on Agriculture) definition refer to HS chapters 1 to 24 (excluding fish and fish products) and a number of manufactured agricultural products (for further information see "The Legal Texts, The Results of the Uruguay Round of Multilateral Negotiations", WTO). This definition does not correspond to the definition of agricultural products presented in the breakdown of merchandise trade by main product group, as indicated below.

Product group definitions

A. Primary products

(i) Agricultural products (SITC sections 0, 1, 2 and 4 minus divisions 27 and 28) of which,

- Food (SITC sections 0, 1, 4 and division 22) of which, of which,

0 - Food and live animals

1 - Beverages and tobacco

4 - Animal and vegetable oils, fats and waxes

22 - Oil seeds and oleaginous fruits

-- Fish (SITC division 03)

-- Other food products and live animals (SITC sections 0, 1, 4 and division 22 minus division 03)

- Raw materials (SITC divisions 21, 23, 24, 25, 26, 29) of which,

21 - Hides, skins and fur skins, raw

23 - Crude rubber (including synthetic and reclaimed)

24 - Cork and wood

25 - Pulp and waste paper

26 - Textile fibres (other than wool tops and other combed wool) and their wastes (not manufactured into yarn or fabric)

29 - Crude animal and vegetable materials, not elsewhere specified

(ii) Fuels and mining products (SITC section 3 and divisions 27, 28, 68) of which,

- Ores and other minerals (SITC divisions 27, 28) of which,

27 - Crude fertilizers, other than those of division 56, and crude minerals (excluding coal, petroleum and precious stones)

28 - Metalliferous ores and metal scrap

- Fuels (SITC section 3)

- Non-ferrous metals (SITC division 68)

B. Manufactures (SITC sections 5, 6, 7, 8 minus division 68 and group 891)

(i) Iron and steel (SITC division 67)

(ii) Chemicals (SITC section 5) of which,

- Pharmaceuticals (SITC division 54)

- Other chemicals (SITC divisions 51, 52, 53, 55, 56, 57, 58, 59) of which,

51 - Organic chemicals

52 - Inorganic chemicals

53 - Dyeing, tanning and colouring materials

55 - Essential oils and resinoids and perfume materials; toilet, polishing and cleaning preparations

56 - Fertilizers (other than those of Group 272, i.e. Fertilizers, crude)

57 - Plastics in primary forms

58 - Plastics in non-primary forms

59 - Chemical materials and products, not elsewhere specified

(iii) Other semi-manufactures (SITC divisions 61, 62, 63, 64, 66, 69) of which,
61 - Leather, leather manufactures, not elsewhere specified and dressed fur skins
62 - Rubber manufactures, not elsewhere specified
63 - Cork and wood manufactures (excluding furniture)
64 - Paper, paperboard and articles of paper pulp, of paper or of paperboard
66 - Non-metallic mineral manufactures, not elsewhere specified
69 - Manufactures of metals, not elsewhere specified
(iv) Machinery and transport equipment (SITC section 7)
- Office and telecommunication equipment (SITC divisions 75, 76 and group 776) of which,
- - Electronic data processing and office equipment (SITC division 75)
- - Telecommunications equipment (SITC division 76)
- - Integrated circuits, and electronic components (SITC group 776)
- Transport equipment (SITC group 713, sub-group 7783 and divisions 78, 79) of which,
78 - Road vehicles (including air-cushion vehicles)
79 - Other transport equipment
- - Automotive products (SITC groups 781, 782, 783, 784 and subgroups 7132, 7783) of which,
781 - Motor cars and other motor vehicles principally designed for the transport of persons (other than public-transport type vehicles), including station wagons and racing cars
782 - Motor vehicles for the transport of goods and special purpose motor vehicles
783 - Road motor vehicles, not elsewhere specified
784 - Parts and accessories of the motor vehicles and tractors
7132 - Internal combustion piston engines for propelling vehicles listed above
- - Other transport equipment (SITC division 79, groups 713, 785, 786 minus sub-group 7132) of which,
79 - Other transport equipment
713 - Internal combustion piston engines, and parts thereof, not elsewhere specified
785 - Motorcycles and cycles, motorized and non-motorized
786 - Trailers and semi-trailers, other vehicles (not mechanically propelled), and specially designed and equipped transport containers
- Other machinery (SITC divisions 71, 72, 73, 74, 77 minus groups 713, 776 minus sub-group 7783) of which,
- - Power generating machinery (SITC division 71 minus group 713) of which,
71 - Power generating machinery and equipment minus
713 - Internal combustion piston engines, and parts thereof, not elsewhere specified
- - Non-electrical machinery (SITC divisions 72, 73, 74) of which,
72 - Machinery specialized for particular industries
73 - Metal working machinery
74 - General industrial machinery and equipment, not elsewhere specified and machine parts, not elsewhere specified
- - Electrical machinery (SITC division 77 minus group 776 and subgroup 7783) of which,
77 - Electrical machinery, apparatus and appliances, not elsewhere specified and electrical parts thereof minus
776 - Thermionic, cold cathode or photo-cathode valves and tubes
7783 - Electrical equipment, not elsewhere specified, for internal combustion engines and vehicles; and parts thereof
(v) Textiles (SITC division 65)
(vi) Clothing (SITC division 84)
(vii) Other manufactures (SITC divisions 81, 82, 83, 85, 87, 88, 89 excluding group 891) of which,
- Personal and household goods (SITC divisions 82, 83 and 85) of which,
82 - Furniture and parts thereof, bedding, mattresses, mattress supports, cushions and similar stuffed furnishings
83 - Travel goods, handbags and similar containers
85 - Footwear
- Scientific and controlling instruments (SITC division 87)
- Miscellaneous manufactures (SITC divisions 81, 88 and 89 minus group 891) of which,
81 - Prefabricated buildings, sanitary plumbing, heating and lighting fixtures and fittings, not elsewhere specified
88 - Photographic apparatus, equipment and supplies and optical goods, not elsewhere specified; watches and clocks
89 - Miscellaneous manufactured articles, not elsewhere specified

C. Other products: commodities and transactions not classified elsewhere (including gold); arms and ammunition (SITC section 9 and group 891)

9 - Commodities and transactions not classified elsewhere in SITC

891 - Arms and Ammunition

D. Intermediate products include all parts and accessories as well as industrial primary and processed intermediate products.

The "fuels and lubricants" category (BEC chapter 3) was excluded. BEC headings 42, 53, 111, 121, 21, 22

BEC headings 42, 53, 111, 121, 21, 22

Merchandise trade and the goods account in balance of payments statistics

Merchandise trade statistics serve as an input for the compilation of the goods account in the balance of payments (BOP) and the rest of the world account in the System of National Accounts (SNA).

The compilation of international merchandise trade statistics (IMTS) relies principally on customs records complemented, as appropriate, by additional sources to enhance their coverage (for instance, to include electricity, or trade in vessels and aircrafts). These statistics essentially reflect the physical movement of goods across borders, while National Accounts and BOP statistics record transactions that involve change in ownership.

Goods for processing with or without change of ownership are recorded in merchandise statistics when they enter or leave the economic territory, irrespective of whether a change in ownership takes place. However, goods supplied to another economy for processing without a change of ownership and returned to the economy of the owner after processing are

not recorded in the balance of payments statistics compiled according to BPM6; further, if the goods are sold to a third economy after processing, then the value of the goods (including the value of processing) is recorded as an export of the economy of the owner and an import of the third economy; the value of the processing is recorded as an export of services of the processing economy and an import of services of the economy of the owner.

Differences between BOP (BPM6) and national accounts statistics and IMTS can be found in the International Merchandise Trade Statistics: Compilers Manual, Revision 1 (IMTS 2010-CM), Chapter XXIV Section B "Goods to be recorded differently in IMTS and BPM6/ national accounts" (p250). (http://unstats.un.org/unsd/trade/publications/seriesf_87Rev1_e_cover.pdf)

Refer to Table 11.1 (p177) in the Balance of Payments and International Investment Position Compilation Guide (http://www.imf.org/external/pubs/ft/bop/2014/pdf/BPM6_11F.pdf)

Trade in commercial services between residents and non-residents of an economy (BPM6)

Depending on the location of the supplier and the consumer, the General Agreement on Trade in Services (GATS) defines four modes of supply. In addition to the cross-border supply (mode 1), where both the supplier and the consumer remain in their respective home territories, GATS also covers cases where consumers are outside their home territory to consume services (mode 2 – consumption abroad), or where service suppliers are in the territory of the consumers to provide their services, whether by establishing affiliates through direct investment abroad (mode 3 – commercial

presence), or through the presence of natural persons (mode 4). An economy's Balance of Payments, namely the services account, can be used to derive estimates covering trade in commercial services for modes 1, 2 and 4. The Balance of Payments does however not include most of the information on services supplied through foreign affiliates that is required to estimate the size of mode 3. A framework for collecting these data, the "Foreign Affiliates Statistics (FATS)" was adopted by the international statistical community for the first time in 2002, and then further developed in 2010.

Trade in commercial services between residents and non-residents of an economy (BPM6), exports and imports

Exports (credits or receipts) and imports (debits or payments) of commercial services are included in balance of payments statistics, in conformity with the concepts, definitions and classification of the sixth (2009) edition of the IMF Balance

of Payments and International Investment Position Manual (BPM6) as well as the 2010 edition of the Manual on Statistics of International Trade in Services (MSITS 2010).

Definition of commercial services in the Balance of Payments

In the sixth edition of the Balance of Payments Manual, the current account is subdivided into goods, services (including government goods and services, n.i.e.), primary income, and secondary income. Commercial services comprise all services categories except government goods and services, n.i.e. Commercial services are sub-divided into goods-related services, transport, travel, and other commercial services.

The BPM6 contains the following 12 standard services components.

- (1) Manufacturing services on physical inputs owned by others
- (2) Maintenance and repair services, n.i.e.
- (3) Transport
- (4) Travel
- (5) Construction
- (6) Insurance and pension services
- (7) Financial services
- (8) Charges for the use of intellectual property, n.i.e.
- (9) Telecommunications, computer and information services
- (10) Other business services
- (11) Personal, cultural and recreational services
- (12) Government goods and services, n.i.e.

Manufacturing services on physical inputs owned by others cover processing, assembly, labelling, packing, and similar activities undertaken by enterprises that do not own the goods concerned and are paid a fee by the owner. Only the fee charged by the processor, which may cover the cost of materials purchased, is included under this item. Examples include oil refining, liquefaction of natural gas, assembly of clothing and electronics, assembly, labelling, and packing.

Maintenance and repair services n.i.e. cover maintenance and repair work – by residents – on goods that are owned by non-residents (and vice versa). The repairs may be performed at the site of the repairer or elsewhere. The value recorded for maintenance and repairs is the value of the work done – not the gross value of the goods before and after repairs.

Manufacturing services on physical inputs owned by others and Maintenance and repair services n.i.e. form a new WTO aggregate named “Goods-related services”.

Transport is the process of carriage of people and objects from one location to another as well as related supporting and auxiliary services. Transport can be classified according to: (i) mode of transport, namely, sea, air, or other (“other” may be further broken down into rail, road, internal waterway, pipeline, and space transport as well as electricity transmission); and (ii) what is carried – passengers or freight. Also included are postal and courier services.

Travel credits cover goods and services – for own use or to give away – acquired by non-residents from an economy during visits to that economy. Travel debits cover goods and services – for own use or to give away – acquired from other economies by residents of the reporting economy during visits to these other economies. The most common goods and services covered are lodging, food and beverages, entertainment and transportation (within the economy visited), gifts and souvenirs. Travel is further subdivided into: (i) personal travel and (ii) business travel.

The aggregate category “Other commercial services” corresponds to the following components defined in BPM6: Construction covers the creation, renovation, repair, or extension of fixed assets in the form of buildings, land improvements of an engineering nature, and other similar engineering constructions such as roads, bridges, dams, and so forth. It also includes related installation and assembly work, site preparation, specialized services such as painting, plumbing, and demolition, and management of construction projects. Construction also covers the acquisition of goods and services by the enterprises undertaking construction work from the economy of location of the construction work. Construction can be divided into (i) construction abroad and (ii) construction in the compiling economy.

Insurance and pension services include services of providing life insurance and annuities, nonlife insurance, reinsurance, freight insurance, pensions, standardized guarantees, and auxiliary services to insurance, pension schemes, and standardized guarantee schemes.

Financial services cover financial intermediary and auxiliary services, except insurance and pension fund services, provided by banks and other financial corporations. They include deposit taking and lending, letters of credit, credit card services, commissions and charges related to financial leasing, factoring, underwriting, and clearing of payments. Also included are financial advisory services, custody of financial assets or bullion, financial asset management, monitoring services, liquidity provision services, risk assumption services other than insurance, merger and acquisition services, credit rating services, stock exchange services, and trust services. Financial services may be charged for by: (i) explicit charges; (ii) margins on buying and selling transactions; (iii) asset management costs deducted from property income receivable in the case of asset-holding entities; or (iv) margins between interest payable and the reference rate on loans and deposits (called financial intermediation service charges indirectly measured – FISIM).

Charges for the use of intellectual property n.i.e. include: (i) Charges for the use of proprietary rights (such as patents, trademarks, copyrights, industrial processes and designs including trade secrets, franchises); these rights can arise from research and development, as well as from marketing; and (ii) Charges for licenses to reproduce or distribute (or both) intellectual property embodied in produced originals or prototypes (such as copyrights on books and manuscripts, computer software, cinematographic works, and sound recordings) and related rights (such as for live performances and television, cable, or satellite broadcast). For the purpose of this report, all references to intellectual property (IP) services or intellectual property related services refer only to "Charges for the use of intellectual property n.i.e.".

Telecommunications, computer and information services cover (i) Telecommunications services, which encompass the broadcast or transmission of sound, images, data, or other information by telephone, telex, telegram, radio and television cable transmission, radio and television satellite, electronic mail, facsimile, and so forth, including business network services, teleconferencing, and support services; (ii) Computer services consisting of hardware- and software-related services and data processing services; (iii) Information services including news agency services, such as the provision of news, photographs, and feature articles to the media as well as database services.

Other business services include (i) Research and development services, (ii) Professional and management consulting services and (iii) Technical, trade-related and other business services. (i) Research and development services consist of services that are associated with basic and applied research, and experimental development of new products and processes. (ii) Professional and management consulting services include (a) legal services, accounting, management consulting, managerial services, and public relations services; and (b) advertising, market research, and public opinion polling services. (iii) Technical, trade-related, and other business services include: (a) architectural, engineering, and other technical services; (b) waste treatment and depollution, agricultural, and mining services; (c) operating leasing services; (d) trade-related services; and (e) other business services n.i.e.

Personal, cultural, and recreational services consist of (i) Audio-visual and related services and (ii) other personal, cultural, and recreational services. (i) Audio-visual and related services cover services and fees related to the production of motion pictures (on film, videotape, disk, or transmitted electronically, etc.), radio and television programs (live or on tape), and musical recordings. (ii) Other personal, cultural, and recreational services include (a) health services, (b) education services, (c) heritage and recreational services, and (d) other personal services. Health services as well as education services are provided remotely or on-site. Data on exports and imports of total services (including government goods and services n.i.e), other services (including government goods and services n.i.e) as well as government goods and services n.i.e. are available as memorandum items in the WTO DATA Portal.

Memo items:

- Total services (Commercial services plus Government goods and services n.i.e)
- Other services (Other commercial services plus Government goods and services n.i.e)
- Government goods and services n.i.e

Government goods and services n.i.e. cover: (a) goods and services supplied by and to enclaves, such as embassies, military bases, and international organizations; (b) goods and services acquired from the host economy by diplomats, consular staff, and military personnel located abroad and their dependents; (c) services supplied by and to governments and not included in other categories of services.

Coverage and comparability

While many economies worldwide have fully implemented the BPM6 for the recording of their Balance of Payments services transactions, some are still compiling their statistics according to the BPM5 methodology. Consequently, comparability and coverage of data may not always be complete. It should be noted in particular that world and regional estimates of trade in new services items such as Manufacturing services on physical inputs owned by others and Maintenance and repair services n.i.e. may be underestimated, as some economies do not report these items yet.

While the coverage and comparability of trade in services statistics have improved significantly over the years, the data remain subject to recognized limitations, such as i) certain countries do not collect figures for all items, ii) statistically capturing some services items remains difficult (more notably on the imports side), iii) data can be reported on a net rather than gross basis, iv) certain transactions may prove complex

to classify appropriately, v) different sources, data collection and estimation methods lead to diverse results, etc. These distortions are more significant on detailed items levels and may lead to considerable asymmetries among countries' reported trade flows by origin and destination.

In June 2020, the United States Bureau of Economic Analysis (BEA) has revised and expanded its statistics on trade in services for 1999 onwards. As a result, the classification of certain services transactions, such as audiovisual services, was amended to align them with international statistical guidelines. Thus, statistics contained in the 2020 and later editions are not comparable with earlier reports. For more information, consult <https://apps.bea.gov/scb/2020/04-april/0420-international-annual-revision-preview.htm#trade-services>.

Statistics on trade in services for the aggregate "European Union" reflect the sum of trade of individual member countries.

Foreign Affiliates Statistics

The new statistical framework on Foreign Affiliates Statistics (FATS) is developed in the Manual on Statistics of International Trade in Services 2010, the OECD Benchmark Definition of Foreign Direct Investment and the OECD Handbook on Economic Globalisation Indicators. The statistical framework covers both goods and services producing enterprises. It analyses the universe of affiliates for which foreign investors own more than 50 per cent of the voting power or equity interest. Depending on the compiler's view, one can distinguish inward FATS, that is, activities of foreign-owned affiliates in the compiling economy, or, outward FATS, that is, foreign affiliates of the compiling economy active abroad. Variables such as sales, value added, number of employees, etc. are used to describe the affiliates' activities. These variables are broken down by country of origin or destination of investments and also by type of primary activity of the affiliates. The United States

also provide a breakdown into total supply of goods and total supply of services products. In the case of services industries the concept of supply (or output) is based on measures that better capture service output (i.e. the margin). This mainly has an impact on the measurement of activities of wholesalers and retailers, insurers and financial intermediaries. From a GATS perspective, the size of mode 3 in a given country can be approximated through the value of the output (or supply) of services by foreign-owned affiliates. In the absence of data on output, sales of services are used. FATS are currently available mainly for OECD and a small number of non-OECD economies. Given the recent development of these statistics, comparability and coverage of individual economy data may not always be complete. Availability of detailed data and long-time series varies considerably between economies.

Other definitions and methods

Annual changes

Throughout this report, average annual percentage changes are analogous to compound interest rates. In calculating the average annual rate of change between 2010 and 2020, for example, data for calendar year 2010 were taken as the starting point, and data for calendar year 2020 as the end point.

World merchandise trade indices

The volume indices and the deflators (i.e. price indices or unit values) are taken from a range of different international and national sources. The reported deflators and volume indices

may not always be available for the most recent years or may differ in product coverage from the corresponding value indices. Aggregation of the indices to obtain a world total is a two-tier process. First, export and import deflators from national and international sources are complemented with WTO and UNCTAD estimates for missing data. They are then aggregated to obtain regional totals. The volume index for each region is obtained by dividing the respective trade value index for each region by the corresponding regional deflator. Second, the total world merchandise volume index is obtained by deflating the world trade value with the aggregate of regional deflators. Throughout the aggregation process trade values of the previous year are used as weights.

World gross domestic product

World GDP growth is estimated as a weighted average of individual economies' real GDP growth. The weights used are shares of the economies' previous year GDP at 2005 constant prices converted to dollars at market exchange rates.

The use of official exchange rates which are not market-based for some major economies, together with the fluctuations of the United States dollar vis-à-vis major currencies, can have a significant impact on the weighting pattern. The increasing use of weights based on purchasing power parities (PPP) by other international organizations is meant to attenuate "anomalies" linked to these factors. In a period of widely diverging growth rates among countries and regions, the choice of the weighting pattern can have a marked influence on the global growth estimate. For the 2000-2011 period,

global growth estimates based on PPP-weights indicate a significantly faster growth than estimates using weights based on GDP data measured at market exchange rates. This is because of differences in the two weighting patterns.

Re-exports and re-imports

Under the system of general trade adopted in this report, re-exports are included in total merchandise trade. However, in the case of Hong Kong, China, the magnitude of its reexports, if included in regional or world aggregates, would adversely affect the analytical value of the statistics by introducing a significant element of double counting. Therefore, Hong Kong, China's re-exports are excluded from the world and Asia (unless otherwise indicated); only Hong Kong, China's domestic exports and retained imports are included in the totals

Specific notes for selected economies

Merchandise trade statistics of the European Union

Beginning with the 2002 report, EU data compiled according to national statistical practices have been replaced, starting 1993, with data compiled by Eurostat in accordance with EU legislation. The concepts and definitions adopted by the EU are in line with the United Nations' International Trade Statistics, Concepts and Definitions, Series M, N° 52, Revision 3. As a result, the conceptual differences between EU member states' data have been substantially reduced. Moreover, for the EU as a whole, Eurostat data are more timely than the previous source, thus reducing substantially the amount of estimation included in the EU aggregate.

Since January 1993, statistics on the trade between the member states of the EU have been collected through the "Intrastat" system (see GATT 1994, International Trade Trends and Statistics). The coverage of this system, which relies on reports submitted by firms for transactions above a minimum value, is not as wide as the previous one, which was based on customs declarations. This is particularly noticeable on the import side. For example, prior to the adoption of the Intrastat system, reported intra-EU imports (c.i.f.) closely matched reported intra-EU exports (f.o.b.).

Major breaks in data continuity of merchandise trade

As of 2012, data on merchandise trade values for Switzerland includes trade in non-monetary gold.

Merchandise trade flows between the European Union member States include trade associated with fraudulent VAT declaration, which concerns mainly office and telecommunications equipment.

Statistical sources

Most frequently used international data sources are:

EIU, The Economist Intelligence Unit
EUROSTAT, Comext and on-line databases
FAO, FAOSTAT Agriculture database
FAO, Production Yearbook
IMF, Balance of Payments Statistics
IMF, International Financial Statistics
IMF, World Economic Outlook database
OECD, Main Economic Indicators
OECD, Measuring Globalisation: The Role of Multinationals in OECD Economies
OECD, Monthly Statistics of International Trade
OECD, National Accounts
OECD, Statistics on International Trade in Services
OECD/IEA, Energy Prices & Taxes
TDM, Trade Data Monitor
UNECE, Economic Survey of Europe
UNECLAC, Overview of the Economies of Latin America and the Caribbean
UNIDO, National Accounts Statistics Database
UNSD, Comtrade database
UNSD, International Trade Statistics Yearbook
UNSD, Monthly Bulletin of Statistics
World Bank, World Development Indicators

Figures for total merchandise trade are largely derived from national sources, supplemented by international databases and Secretariat estimates. Data on merchandise trade by product are mainly obtained from Eurostat's Comext database, the Trade Data Monitor and UNSD's Comtrade database. Some inconsistencies in the aggregate export and import data for the same country or territory between sources are inevitable. These can be attributed to the use of different systems of recording trade, to the way in which data sources have converted data expressed in national currencies into dollars, and different implementation of historical revisions.

Statistics on trade in commercial services are mainly drawn from the IMF Balance of Payments Statistics and the Trade in Services by Partner Country dataset of the OECD. Data for European Union members are drawn from Eurostat's on-line database. European Union figures for partner 'World' are the aggregates of its 27 members (per 2020 membership) country data. European Union intra-trade and extra-trade are the aggregated statistics,

based on the quarterly BOP data set, published by Eurostat, and may not correspond to total EU aggregates, which are based on annual statistics of the individual countries. For other economies that do not report to the IMF (e.g., Chinese Taipei) data are drawn from national sources.

Estimations for missing data are mainly based on national statistics.

Acknowledgements are due to the Food and Agriculture Organization, the International Monetary Fund, the Organization for Economic Co-operation and Development, the Statistical Office of the European Communities, the United Nations Economic Commission for Europe, the United Nations Economic Commission for Latin America and the Caribbean, the United Nations Statistics Division, the United Nations Industrial Development Organization, the World Intellectual Property Organization and the World Bank whose assistance in supplying advance information has greatly facilitated the work of the Secretariat. Acknowledgements are also due to national institutions for providing advance statistics.

Closing date for merchandise trade statistics (Customs basis), commercial services (Balance of Payments basis) and foreign affiliates is 30 June 2021.

Abbreviations and symbols

ACP	African, Caribbean and Pacific Group of States
AfCFTA	African Continental Free Trade Area
ASEAN	Association of South-East Asian Nations
AFTA ASEAN	Free Trade Area
BOP	Balance of Payments

c.i.f.	cost, insurance and freight
f.o.b.	free on board
n.e.s.	not elsewhere specified
n.i.e.	not included elsewhere

The following symbols are used in this publication:

...	not available or growth rates exceeding 500%
0	figure is zero or became zero due to rounding
-	not applicable
US\$	United States dollars
Q1, Q2, Q3, Q4	1st quarter, 2nd quarter, 3rd quarter, 4th quarter
I	break in comparability of data series. Data after the symbol do not form a consistent series with those from earlier years.

Billion means one thousand million.

Minor discrepancies between constituent figures and totals are due to rounding.

Unless otherwise indicated, (i) all value figures are expressed in U.S. dollars; (ii) trade figures include the intra-trade of free trade areas, customs unions, geographical and other groups; (iii) merchandise trade figures are on a customs basis and (iv) merchandise exports are f.o.b. and merchandise imports are c.i.f. Data for the latest year are provisional.

The statistical data in this publication are supplied by and under the responsibility of the relevant statistical authorities. In line with the practice of the WTO Secretariat, this publication uses the names of members as listed in the latest revision to document WT/INF/43. References to other geographical territories and groupings are based solely on terms provided to the WTO Secretariat by WTO members and observers or terms used by relevant international organizations.

The use of such data and terms does not constitute or imply an expression of opinion by the WTO Secretariat concerning the status of any country or territory, or the delimitation of its frontiers, or sovereignty. The colours, boundaries and names shown and the designations used on maps in this publication do not imply any judgment, official endorsement or acceptance by the WTO Secretariat as to the legal status or frontier of any territory, or the rights and obligations of any WTO member in respect of WTO agreements. References and data relating to territories that are not WTO members or observers in their own right do not amount to an endorsement as to the WTO status, if any, of such territories.

Closing date 30 June 2021

GATT/WTO Members (5)	63.4	69.6	75.0	84.1	77.0	89.0	98.3	98.6

Note : Between 1973 and 1983 and between 1993 and 2003 export shares were significantly influenced by oil price developments.

(1) Figures refer to the Fed. Rep. of Germany from 1948 through 1983.

(2) Figures are significantly affected by including the mutual trade flows of the Baltic States and the CIS between 1993 and 2003.

(3) Beginning with 1998, figures refer to South Africa only and no longer to the Southern African Customs Union.

(4) Figures refer to the EEC(6) in 1963, EC(9) in 1973, EC(10) in 1983, EU(12) in 1993, EU(25) in 2003, and the European Union, excluding the United Kingdom, in 2020.

(5) Membership as of the year stated.

Note: Figures for a number of countries and territories have been estimated by the Secretariat. Annual percentage changes and rankings are affected by continuity breaks in the series for a large number of economies, and by limitations in cross-country comparability. See the Metadata. For more annual data, see Tables A60 and A61.

(1) Refers to 2016.

(2) Refers to total services.

(3) The following transactions are not allocated geographically: travel exports and imports; financial services exports related to foreign exchange trading; imports of freight

(4) In 2019, ASEAN countries accounted for 9 per cent of total commercial services exports and 5 per cent of imports.

(5) Financial intermediation services indirectly measured (FISIM) are not allocated geographically.

(6) Refers to 2018.

(7) In 2019, ASEAN countries accounted for 41 per cent of total commercial services exports and 34 per cent of imports.

Table A11

Ratio of exports of goods and commercial services to GDP of the least-developed countries, 2020

(Million dollars and percentage)

Note: Data for 2020 are largely estimated.

(1) Bhutan is included for its exports of electric current.

(2) Includes exporters of gold (normally classified in n.e.s. according to the UN Standard International Trade Classification) and diamonds (normally included in manufactures according to the UN classification).

(3) Includes significant re-exports or imports for re-export.

Note: Breaks in the continuity of the value series for particular countries and regional groupings are indicated by an 'I'. They result mainly from changes in the methods of collecting and reporting merchandise statistics.

It should be noted that the World and Asia totals contain a significant element of double counting due to the use of the general system of recording merchandise trade statistics which includes re-exports.

(1) Includes significant re-exports.

Note: Breaks in the continuity of the value series for particular countries and regional groupings are indicated by an 'I'. They result mainly from changes in the methods of collecting and reporting merchandise trade statistics.

It should be noted that the World and Asia totals contain a significant element of double counting due to the use of the general system of recording merchandise trade statistics which includes re-exports.

Recent figures for a number of countries and territories have been estimated by the Secretariat.

(1) Includes significant imports for re-export.

(2) Imports are valued f.o.b.

European Union (1), (4)	0.0	0.0	1194.9

Excluding wholesale and retail trade as well as repair activities. Unless otherwise specified:

- all or a large part of financial service activities are excluded;
- all or a large part of community, social and personal services activities are excluded;
- insurance activities and/or activities auxiliary to financial and insurance activities are included.

(1) Insurance activities and activities auxiliary to financial and insurance activities are not covered.

(2) Financial service activities are included.

(3) Community, social and personal services activities are included.

(4) Real estate activities are not covered.

(5) Includes other income.

(6) Insurance activities and activities auxiliary to financial and insurance activities are not covered starting in 2013 for Latvia, 2014 for Hungary.

(7) Fiscal year as reference period.

(8) No estimation for non-response.

Note: Given the recent development of this statistical framework, comparability and coverage of data may not always be complete. See the Metadata.

Excluding wholesale and retail trade and repair activities.

(1) Fiscal year as reference period.

(2) Classified under services according to activity of parent company.

(3) Accommodation and food services, financial intermediation activities, as well as education, health and social work activities are not covered.

(4) Branches are excluded.

(5) Also includes affiliates foreign owned by more than 10 per cent. Excludes affiliates of parent companies active in finance, insurance and real estate. No estimation for non-response.

(6) Includes wholesale and retail trade and repair activities.

Note: Given the recent development of this statistical framework, comparability and coverage of data may not always be complete. See the Metadata.

Note: This information refers to supply of services products to foreigners by United States owned affiliates and supply of services products to United States persons by affiliates foreign owned. This differs from the FATS data presented for the United States in the tables A62 and A63 which refer to sales of foreign affiliates operating in the services sector. For instance the latter include sales of goods of foreign affiliates whose primary activity is classified as a service industry but not the supply of services of those whose primary activity is classified as a manufacturing industry.
